| Our Purpose And How We Get The Job Done

Delivering earthmoving solutions for over a decade, with a focus on durability and meeting the unique demands of every project.

Our mission is to provide reliable and professional solutions for all earthmoving and civil construction jobs. We offer reasonably priced, quality work for every project.

Our team is dedicated to meeting client's needs. Every project is assessed on an individual basis to ensure the project will meet the long-term needs of the client. We achieve this by following a strategic approach to delivery which includes:

1. Due diligence to manage project risks for safety, public services (e.g. utilities and transport), environment and cultural heritage.
2. Selection of the right machinery and team.
3. Appropriate quality and quantity of materials and products.
4. Compliance with industry regulations and standards.

Ongoing communication with the client from the initial scoping stages of a project to completion is vital to our success. This allows us to fully understand the needs of our client and to adapt as required.

Our team is committed to consistently proving our value by delivering results and earning trust throughout every project.

We aim to ensure the long-term success of our clients while contributing to the growth of regional Victoria and New South Wales.

Committed to client satisfaction, ensuring every project meets client expectations every step of the way.

| Our Services

Our services are designed to provide solutions for all your earthmoving and civil construction needs. With a focus on quality, efficiency and reliability, we deliver tailored solutions to meet the demands of every project.

Our team utilises an array of equipment to handle every task efficiently, ensuring quality results to meet your earthmoving needs.

» Road Maintenance and Construction

Maintenance and construction of sealed and unsealed roads to maintain road safety and functionality to meet both immediate and long-term needs. Services include maintenance grading, shoulder repairs, material cartage, re-sheeting, road construction, drainage and removal of unwanted materials.

We utilise a range of plant in our fleet to restore road surfaces, including grader teams (grader with GPS, water carts, combination tractor and roller), truck and dogs, excavators and skid steers.

» Material Cartage

Our fleet of truck and dogs as well as earthmoving equipment allows for the loading and transportation of gravel, sand and other quarry materials, as well as the removal of debris and unwanted site waste.

» Material Cartage

Expertise in flood mitigation and repair works including drainage, levee bank and road construction. We bring experience, appropriate machinery and a commitment to lending a helping hand to every site, ensuring each project meets high-quality standards and client expectations across diverse infrastructure needs.

» Bulk Earthworks

Large-scale excavation and material movement for industrial, civil and commercial projects.

» Project Management

Our team manages earthmoving and civil construction projects in their entirety. To support seamless project execution, we hire additional plant and outsource services that are not part of our core business or speciality.

We ensure that effective traffic management and safety precautions are taken, services are located, cultural heritage is protected and significant vegetation preservation is maintained across all projects and site locations.

» Urban Civil Construction

Our fleet of truck and dogs as well as earthmoving equipment allows for the loading and transportation of gravel, sand and other quarry materials, as well as the removal of debris and unwanted site waste.

| Industries We Serve

Our expertise spans a variety of industries, ensuring tailored solutions for each client. We provide specialised services across emerging and established locations. With a focus on innovation and quality, we address diverse infrastructure and development needs, ensuring each project is delivered to the highest standards with efficiency and reliability.

A dedication to excellence across projects of all sizes.

| Our Clients

NGH Earthmoving has successfully partnered with a diverse range of clients, delivering consistent results and maintaining a steadfast commitment to getting the job done right. Our approach ensures long-lasting client satisfaction and trust.

| Accreditation + Expertise

Our team brings certified expertise and a strong commitment to quality assurance, ensuring every project is executed with precision and care. We take pride in maintaining industry-leading standards across our range of services, supported by our team's extensive training and professional qualifications.

- » **Appropriate truck licenses**
- » **Training certifications in relevant civil construction plant operations, training and assessment, construction induction and safety.**
- » **Bachelor of science with honors**
- » **Third party assessed plant and equipment honors**

Our team collectively has decades of experience in earthmoving and civil construction works, with the relevant licenses, certificates and skills.

| Our Fleet

Our diverse over 20 strong fleet is at the core of our operations, equipped to handle a wide range of earthmoving and civil construction projects. We prioritise maintenance to ensure every machine operates at peak performance, minimising downtime and maximising efficiency. We are dedicated to having the right equipment for every project, going the extra mile to acquire the plant to meet any demand. Our well-maintained equipment, supported by skilled operators, allows us to deliver consistent, reliable results on every project.

- Trucks (4 x 12.5 ton)
- Truck and Dogs (4 x 28-38 ton)
- Water Carts (14, 000L and 30, 000 L)
- Graders (12ft 670 John Deer and 14ft m series Cat with GPS)
- Skid Steer and attachments
- Excavators (3.5, 9, 15 and 25 ton)
- Combination Rollers (12 and 13 ton)
- Tractors (3 x 120-150hp) and slasher attachment
- Loader

Flood Emergency Works for Campaspe Shire Council

The Challenge

Campaspe Shire Council required urgent flood emergency works to mitigate the widespread damage caused by the Murray River flooding. Significant challenges included extensive road damage, washed-out infrastructure and levee bank damage. Restoration of infrastructure was required to support the affected communities.

Our Solution

NGH Earthmoving provided immediate support by rehabilitating roads including sealed and unsealed road construction, maintenance grading and removal of material, drainage works, restoring levee banks and rehabilitating walking tracks. Our skilled team worked closely with Campaspe Shire Council to ensure efficient execution and avoid impact to services (e.g. waste, emergency and transport).

The Result

Roads were repaired swiftly; community regained accessibility and future damage was minimised through pre-emptive measures. Our prompt response, expert execution and commitment to quality work earned the trust of the council and paved the way for future collaborations.
